

# Elevate Patient Care with Daily Insights

Stay seamlessly connected with your patients' well-being through nanaCONNECT, a revolutionary text-based solution designed for Home Health and Hospice agencies.

## Why nanaCONNECT?

nanaCONNECT redefines patient care, particularly for those who may need extra attention or are living independently. By leveraging daily check-ins and a user-friendly rating system, you can be confident in your patients' well-being. Plus, nanaCONNECT is highly adaptable, ensuring it fits seamlessly into your agency's workflow.

## How it works?

nanaCONNECT streamlines patient care by enabling daily check-ins through text messages, allowing agencies to monitor patients' well-being. By utilizing nanaCONNECT, we fetch basic patient data from your EMR System and initiate this engagement. Patients respond with their well-being on a scale of 1 (bad) to 5 (good), triggering customized workflows if their response is negative. This approach enhances communication, leading to better patient engagement and ultimately improved health outcomes.

## Benefits

### Reduced Healthcare Costs

Keep patients where they belong - in the comfort of their homes. Prevent costly hospitalizations, benefiting both patients and providers.

### Improved Patient Outcomes

Close monitoring leads to better outcomes, especially when patients can recover in familiar surroundings. Daily check-ins promote comfort and aid in their overall health.

### Heightened Patient Satisfaction

Daily interactions positively impact patients' well-being. By providing timely follow-ups for those in need, you can elevate overall satisfaction levels.

### Enhanced Continuity of Care

Work hand-in-hand with families and other healthcare providers. Ensure that Nana receives the right care at the right time, fostering a seamless healthcare experience.

Elevate your patient care with nanaCONNECT - where every interaction brings you closer to improved well-being.
